NAS 261
Advanced Setup for Surveillance Center

Advanced settings for Surveillance Center

ASUSTOR COLLEGE
COURSE OBJECTIVES

Upon completion of this course you should be able to:

1. Configure basic and advanced settings for Surveillance Center

PREQUISITES

Course Prerequisites:
NAS 161: Introduction to Surveillance Center

Students are expected to have a working knowledge of:
Surveillance Center

OUTLINE

1. Surveillance Center Settings
   1.1 Adjusting camera settings
   1.2 Configuring user privileges
   1.3 Event notification
   1.4 Advanced system settings
1. Surveillance Center Settings

1.1 Adjusting camera settings

STEP 1

✓ Log in to ADM using the “admin” account.
✓ Double-click on the Surveillance Center icon.
✓ Select [Settings] → [Camera] to enter the camera list screen.

![Camera Settings Screen]

STEP 2

Select the camera that you want to adjust and then click on the [Edit] button. You can then edit the basic settings, recording format and recording schedule for the camera.

![Edit Camera Screen]
1.2 Configuring user privileges

STEP 1

- System administrators all possess the right to log into Surveillance Center. If you wish to grant other users the access rights to access Surveillance Center, please go to [Access Control] → [App Privileges] in ADM.

- Surveillance Center access rights are categorized into the “Manager” and “Viewer” roles. Users who possess “Manager” privileges are able to access and use all functions while “Viewers” only able to use the Live View and Playback functions.

- Other than the “admin” account, all other users will be set to “Viewer” by default. If you wish to configure user privileges, please select [Settings] → [Privilege] from within Surveillance Center.
1.3 Event notification

STEP 1

✓ You can configure Surveillance Center to immediately send you notifications when events occur.
✓ If you wish to use the event notification feature please select [Settings] → [Notification].

Note: To enable notification services, please log in to ADM and add a sender account (e-mail/SMS) in the [Notification] section under [Settings].

STEP 2

Use the “E-mail” or “SMS” tabs to configure the e-mail accounts and phone numbers you want notified when events occur.
STEP 3
You can also configure the notification method and whether to send notifications for each specific type of event.

1.4 Advanced system settings

STEP 1
✓ You can access Surveillance Center’s advanced settings by selecting [Settings] → [Advanced Settings].
✓ Here you can configure the maximum length of each recording and pre-recording and post-recording for events.¹
✓ You can also configure whether or not you want to set a storage quota² and how the system will respond when maximum storage capacity is reached.

¹If you are using Alarm or Motion Recording it is recommended that you use the “Pre-recording/Post-recording” function in order to avoid omitting the capture of critical video because of network delays.
²It is recommended that you enable the “Storage Quota” function in order to avoid having your NAS’s storage volumes occupied by your recorded video files.
