

Release Notes

Update: Oct. 18, 2013

Name

ADM 2.0.3 (RAH1)

Installation Notes

This is the software for AS-6XX series. It's recommended that you should back up your data before updating your system.

What's New?

- Supports multi language naming for shared folders
- Supports using domain name for Share Links
- VPN client can automatically reconnect after system start up

Change Log

- "Java detect script recognized as virus by Norton 360" issue fixed
- "Java plug-in security warning" issue fixed
- "File Explorer failed to upload files when connecting with https" issue fixed
- Improved the stability of link aggregation
- Reserved port 8000 and 8001 for system use
- Improved the support for UPS
- Miscellaneous minor bug fixes

Known Limitations/Issues

When uploading a file via a Web browser and File Explorer, the maximum size of the file will be limited to 2GB if Java has not been enabled. This is due to Web browsers' limitation.

Bug Reporting

Please use the [online support form](#) or post in the ASUSTOR [online forum](#).
