Release Notes

Update: Jul 26, 2017

Name

ADM 3.0.0.B7Q1

Installation Notes

- No matter if you decide to upgrade ADM or not, it is still recommended that you should back up all data on your NAS.
- After upgrading, you can not roll back to previous version of ADM 3.0 and ADM 2.7.
- When performing a system migration from a newer version of ADM to an older version of ADM, please be sure to upgrade the destination NAS with latest version of ADM after system migration completes.

What's New?

- Added Seagate IronWolf Health Management feature.
- Unable to update firmware to a previous version.
- Improve UI usability for ADM 3.0

Change Log

- Fixed issue "Fan speed of AS6302T/AS6404T abnormally high"
- Fixed issue of photo viewer and music player
