Release Notes

Update: Sep 19, 2017

Name

ADM 3.0.1.R9J2

Installation Notes

- No matter if you decide to upgrade ADM or not, it is still recommended that you should back up all data on your NAS.
- After upgrading, unable to update firmware to a previous version of ADM 3.0 and ADM 2.7.
- After upgrading to ADM 3.0 official, some apps will be disabled because of incompatibility. Please update these apps to latest version at App central. After you upgrade those apps, you should be able to use them (make sure those apps are enable too).DataSync for hubiC for ADM 3.0 are still in beta, please go to ADM\App Central\Beta Apps to download and install.
- When performing a system migration from a newer version of ADM to an older version of ADM, please be sure to upgrade the destination NAS with latest version of ADM after system migration completes.

What's New?

(since ADM 3.0.0.R8N2)

- Added IHM support of ASUSTOR AS6004U
