

Release Notes

Update: Dec 19, 2017

Name

ADM 3.1.0.BCJ1

Installation Notes

- This version of ADM is in beta. It is recommended to backup any important data before updating.
- After upgrading to ADM 3.1 Beta, it will no longer be possible to revert back to an older version of ADM.
- After upgrading to ADM 3.1 Beta, please update all NAS apps and mobile apps to minimize compatibility issues.

What's New?

- SSD Cache
 - Support 1~4 SSD
 - Support Read-only mode (Raid 0) and Read-Write mode (Raid 1,5, 10)
 - Supported Models: AS31/32/50/51/61/62/63/64/70 series
- LDAP Client
 - Sync with LDAP Server
 - Samba, AFTP, FTP login
- RAID Scrubbing
 - Support RAID 5 and RAID 6

Chang log

- support ASUS USB-AC68 (RTL8814AU) wifi dongle (Only for AS-6, AS31/32/50/51/61/62/63/64/70)
- Allow to disable "admin" account
- misc bug fixed.

Known Limitations/Issues

- If a read-only SSD Cache fails, the volume the SSD Cache is mounted on will be unreadable.
- Unable to start Docker-CE.

Bug Reporting

Please use the [online support form](#) or post in the ASUSTOR [online forum](#).
