Release Notes

Name

ADM 3.1.0.BDA1

Installation Notes

- This version of ADM is in beta. It is recommended to backup any important data before updating.
- After upgrading to ADM 3.1 Beta, it will no longer be possible to revert back to an older version of ADM.
- After upgrading to ADM 3.1 Beta, please update all NAS apps and mobile apps to minimize compatibility issues.

What's New?
(since ADM 3.1.0.BCJ1)

- N/A

Chang log

- Fixed issue "Unable to start Docker-CE"
- Fixed issue "Fast forward specific songs will delete those songs"
- Fixed issue "Unable to change Network Recycle Bin Emptying Schedule"
- Fixed issue "Unable to create Scheduled FTP Backup for next year"
- Fixed issue "When NAS is awaken from sleep mode, unable to hold down power button for 1.5 seconds to shut down NAS"
- Fixed issue "Unable to mount Read-Write SSD Cache"
- Fixed issue "LED dimming does not work"

Known Limitations/Issues

- If a read-only SSD Cache fails, the volume the SSD Cache is mounted on will be unreadable.

Bug Reporting
